Intro

The following describes the key features of kippy by showing how a typical system would be set up from start to end.

Also, when you login, videos show you how to get started.

The quick start wizard guides you step-by-step on how to get set up – highlighting the buttons to be clicked at each step.

Overview

The Overview screen provides each user with a personal view of key information and activities, which includes any due check ins and tasks.

Teams

The team structure is created hierarchically by either the Admin adding sub-teams to a team or a Manager adding Employees to a team.

Double-click on the team boxes in the structure to collapse/expand each portion of the tree. Hold shift and scroll your mouse wheel for slow zoom in and out.

Use the “Follow me?” option in User profile to simplify the displayed teams hierarchy to only how the ancestors and direct children of the selected team.

Kippy dashboard header showing navigation tabs (Home, Analyze, Collaborate, Reports, Tools, Help), a dropdown menu (UK), a button (The Solution Crowd), a date selector (Feb), a year selector (2024), and a user profile icon. Below the header, there are two status indicators: 97 unapproved KPIs and 2 self-appraisals to review.

Teams

Add teams and people directly to the hierarchy.

The screenshot shows the Kippy dashboard with a modal window titled "Add a new team" open. The modal has a section for "Add to Sales" with a text input field containing "South America". Below the input field are two buttons: "CLOSE" and "ADD TEAM". The background shows a complex organizational chart with various teams and individuals, including Business Support, Operations, Sales, Information Technology, Human Resources, UK, and MENA. The chart is color-coded and includes KPI scores for each team and individual.

Kippy – Features

The team dropdown shows the org hierarchy and level of each team in the organisation.

Objectives

Then, each team can create local objectives and KPIs that are linked to the objectives of the parent team/department they are part of.

Cascade objectives vertically down your organisation and create local objectives.

Kippy AI

From your request, you are interested in viewing the sales Key Performance Indicators (KPIs) for your organization. Based on the data provided, here are some of the key sales KPIs:

1. **# of Customers with Sales More Than 1 Million**:

- Owner: Owen Turner

- Target: 41

- Actual: 55

- Score: 134 (Green)

2. **# of Innovation Ideas Submitted**:

- Owner: Sari Kana

- Target: 70

- Actual: 91

- Score: 130 (Green)

3. **# of Key Business Processes Improved and/or Automated**:

- Owner: Sari Kana

- Target: 112

- Actual: 111

- Score: 99 (Amber)

4. **% Customers Satisfaction**:

- Owner: Joe Bazel

To bulk import users into Kippy, you can utilize the Quick Set feature with pre-built Excel templates. Here's a brief overview of the process:

1. **Prepare Your Data**:

Use the provided Excel template to organize your user data.

2. **Complete Required Fields**:

Make sure all necessary fields in the template are filled out correctly.

3. **Upload the File**:

Use the Quick Set feature to upload your completed Excel file.

For more detailed instructions, you can refer to the [Kippy Quick Set documentation] (<https://www.kippy.cloud/quickset>).

If you need help with preparing your Excel template or have questions about user roles, feel free to ask. Alternatively, you can email support@kippy.me for further assistance.

Is there anything else you would like to know about using Kippy?

Executive Intelligence

Executive Intelligence transforms organisational data into actionable leadership insight.

Every executive has a recurring need to understand the current state of the organisation before making decisions, meeting with their leadership team or reporting to the board.

Traditionally, this means reviewing multiple dashboards, reading departmental reports, analysing KPI trends and piecing together information from across the business to determine what is working, what is at risk and where attention is needed.

Executive Intelligence automates and expedites this process. It continuously analyses your strategic objectives, KPIs, projects and organisational performance to identify emerging risks, highlight progress and explain the factors driving change.

Instead of spending time gathering and interpreting information, executives receive clear, contextual insights that enable faster, more informed decision-making while keeping strategic execution aligned with business priorities.

For leadership teams, the value lies in the outcomes rather than the mechanism. Executive Intelligence reduces the time spent preparing and reviewing reports, identifies strategic risks before they become significant issues, explains why performance is changing and delivers concise, executive-ready summaries that support board and leadership discussions.

The result is that executives spend less time searching for information and more time leading the organisation—making timely decisions, driving accountability, focusing leadership discussions on the issues that matter most and improving organisational performance.

Below is a sample Executive Report that is automatically generated and emailed based on your organisational data, reporting preferences and preferred reporting cadence.

Executive Report (Jun 2026)

EXECUTIVE INTELLIGENCE

- **Strategy Status:** Overall team health scores look strong (Team Score 92; People 97; Process 92; Finance 93) but material gaps in growth, liquidity and project delivery threaten strategy execution.
- **What Matters:** Liquidity and growth. Current Ratio is 2 (target 3, score 67, red). New Customers Ratio is 2% (target 5%, score 40, red) and Revenue Growth Rate is 500 (target 750, score 67, red). Strategic projects delivering customer and people change are underperforming (PMS Project score -36, ATL campaign amber).
- **Why It Matters:** Low liquidity and slowing customer acquisition will constrain ability to invest and sustain growth. Failing strategic projects create execution risk despite strong headline KPI scores in IT productivity and retention. Data contradictions (e.g., Net Profit Margin 90% vs Operating Profit Margin 3%) undermine credible decision-making.
- **What Changed:** Core people metrics have improved (IT Project completion 44% vs target 20; retention and several people KPIs scoring green/120). At the same time, customer growth and product expansion slipped (New Customers 2%, Product Expansion 6%), and several strategic projects moved to amber/red.
- **Board Perspective:** The board will see strong operational scores but worry about sustainability. They will demand clarity on liquidity remediation, a credible growth plan, and assurance that failing projects will be fixed or closed.

EXECUTIVE CHALLENGE

- Leadership Must Explain: Why balance-sheet and growth KPIs are deteriorating while many people and process KPIs report green — and who is accountable for reversing the customer acquisition and operating margin shortfalls.
- Kippy Challenge: The data shows inconsistent signals. Either KPI definitions and data feeds are wrong or execution is mismeasured. Leadership appears to be rewarding activity and local KPIs while strategic projects and top-line growth lack effective governance and resources.
- Board Question: What is the 60-day recovery plan to restore liquidity to target and to stop the revenue decline?
- Consequence Of Inaction: Continued cash pressure will force cuts or emergency financing. Growth momentum will be lost, projects will consume resources without delivering value, and the board will likely demand leadership changes or reallocation of capital.
- Required Leadership Response: Immediately validate KPI definitions and data sources for finance and margins. Convene a 30/60/90 recovery plan for liquidity, customer acquisition and the PMS Project with named owners, milestones and stop/go criteria. Reprioritise budget from low-impact activities to the highest ROI growth levers.

EXECUTIVE SUMMARY

- **Performance:** Aggregate scores are healthy (Team 92). Strengths: IT project completion (44% vs 20 target), retention metrics and Inventory Turnover (66 vs 29 target). Weaknesses: Current Ratio (2), Operating Profit Margin (3% vs 6% target), New Customers Ratio (2%), Revenue Growth Rate (500 vs 750).
- **Risks:** Short-term liquidity and top-line growth. Project delivery risk in IT (PMS Project -36). Data/measurement risk from conflicting margin KPIs and some missing/blank KPI values.
- **Trends:** People and process KPIs trending strong. Customer acquisition, product expansion and revenue growth trending weak. Several projects slipping into amber/red.
- **Strategic Alignment:** Tactical focus on internal KPIs has outpaced investment in customer acquisition and product expansion. Objectives tied to growth show lower scores than people/process objectives, indicating misalignment.
- **People:** Employee KPI scores are mostly satisfactory to excellent, and competency appraisals are strong for several leaders. However, multiple leaders have negative project scores (e.g., Owen -18, Nauman -8), signaling execution overload or misprioritisation.
- **Execution:** Project governance is the bottleneck. PMS Project is failing; ATL campaign and other programmes are underperforming. Several projects lack clear sponsors or mitigation clarity.
- **Run The Business vs Strategy:** Run-the-business metrics (Inventory Turnover, MRR) are stable. Strategic growth investments are not converting to new customers or revenue at target rates.
- **Financial Impact:** Low Current Ratio and weak operating margin increase refinancing risk. High Cost per Hire (44 vs 20.9 target, score 48 red) raises recruitment cost base. Offsetting positives are strong Inventory Turnover and Net Profit Margin, but the margin discrepancy requires immediate reconciliation.
- **Board View:** The board will ask for data integrity proof, a prioritized rescue plan for failing projects, and a near-term cash and growth recovery roadmap.

LEADERSHIP FOCUS

- 1) Run an immediate KPI and data integrity audit for finance and margin KPIs. Reconcile Net Profit vs Operating Profit definitions.
 - 2) Launch 30/60/90 recovery plans with named owners for Current Ratio, New Customers Ratio and Revenue Growth. Include stop/go rules for failing projects (PMS Project, ATL campaign).
 - 3) Reallocate budget and senior sponsorship to highest ROI growth activities; tighten project governance and require weekly delivery checkpoints.
-

QUESTIONS LEADERSHIP SHOULD ASK

- 1) Who owns the recovery of Current Ratio to 3.0 and what are the concrete 60-day actions and cash targets?
- 2) How will we increase New Customers Ratio from 2% to ≥5% within one quarter and who is accountable for that outcome?
- 3) Why does Net Profit Margin report 90% while Operating Profit Margin is 3% and who can validate and sign off these figures today?
- 4) What are the stop/reshape decisions for the PMS Project and ATL campaign, and what is the one-line remediation plan with owner and due dates?
- 5) Which hires or recruitment processes can be paused or redesigned to reduce Cost per Hire from 44 to target without compromising critical capability?

Go to the Executive Brief screen to generate an AI summary based on all the current data you have in kippy.

Executive Report - Jul 2026 - Generated 1 day ago

EXECUTIVE INTELLIGENCE

- Strategy Status: Core people and process initiatives are executing well but critical revenue and profitability signals are weak or missing.
- What Matters: The organisation shows strong People/Process scores (People 98, Process 103) while Finance (93) and Customers (84) obscure material weaknesses: operating profit margin is 3% (target 6%), current ratio 2.0 (target 3.0) and Sales "Total sales" is reporting zero. Data gaps on new-customer KPIs and sales figures undermine confidence in growth claims.
- Why It Matters: If revenue recognition and sales data are unreliable, good operational scores cannot be converted into sustainable cash and profit. Low liquidity and margins increase refinancing and covenant risk and reduce capacity to invest in strategic initiatives already resourced by people/process programs.
- What Changed: Project delivery slipped: the PMS Project closed with a -35 score (red) and the PMS upgrade is behind target (amber). Operating Profit Margin moved into red; Total sales for Sales team is 0 (score 0). Cost metrics (Cost per Hire, CapEx ratio, OPEX/unit) remain materially above targets.
- Board Perspective: The board will be most worried about financial integrity and execution risk – missing or zero sales reporting, deteriorating margin and low current ratio despite high internal readiness scores. They will question the reporting controls and whether operational wins are masking commercial and financial decline.

EXECUTIVE CHALLENGE

- Leadership Must Explain: Why commercial and financial metrics (Total sales = 0, Operating Profit Margin 3%, Current Ratio 2.0) diverge sharply from positive People/Process performance and why several cost KPIs (Cost per Hire, CapEx ratio, OPEX per unit) remain significantly off-target.
- Kippy Challenge: High objective and employee appraisal scores are not translating into revenue or margin. Either sales and finance data flows are broken or priorities are misallocated (heavy investment in people/process while commercial delivery and cash generation lags). Project governance is weak – a critical people-system (PMS) failed.
- Board Question: Why are sales and revenue numbers incomplete or zero while we continue to approve people/process initiatives?
- Consequence Of Inaction: Continued data gaps and poor margins will erode cash reserves and investor/board trust. Projects critical to performance management will not deliver expected productivity gains, increasing headcount and OPEX risk and prompting potential emergency cost cuts later.
- Required Leadership Response: Immediately validate sales and revenue reporting lines and reconcile missing Total sales entries. Declare and execute a 60-90 day cash-and-margin remediation plan (focus on collections, pricing, OPEX). Pause non-essential spend and re-align a rescue team to address the failed PMS and upgrade project governance.

EXECUTIVE SUMMARY

- Performance: Operational KPIs in People and Process show strong activity and compliance. Several customer-acquisition and product expansion KPIs are underperforming. Finance shows mixed signals: inventory turnover high but liquidity and profitability weak.
- Risks: Data quality and reporting risk (missing sales, blank new-customer KPIs). Liquidity and margin risk from low Current Ratio (2.0) and Operating Profit Margin (3%). Project execution risk from failed PMS project.
- Trends: Projects linked to performance management are slipping. Cost metrics (Cost per Hire, CapEx ratio, OPEX/unit) persistently worse than targets. Some strategic growth KPIs (New Customers Ratio 3% vs 5% target; Product Expansion 6% vs 10%) are declining.
- Strategic Alignment: Execution focus is skewed toward internal readiness rather than commercial outcomes. People/process investments are not yet anchored to revenue delivery.
- People: Appraisals show competency inflation (several appraisee competency scores >100) while several employees have low live KPI scores (e.g., Alex 56). Project responsibilities have negative project scores for senior owners, indicating weak delivery accountability.

Legend: >=100% 80-99% <80% Target Missing Not Due

As you can see, the executive report is displayed with a number of high-level sections, insights and actions; which are all configurable, but by default include:

- Executive Intelligence
- Executive Challenge
- Executive Summary
- Leadership Focus
- Questions Leadership Should Ask

Schedule executive report email

To have the executive report emailed to you on a regular basis, you can edit your profile and choose when to have it emailed to you. Click the **SCHEDULE** button. In the 'Include reports' multi-select drop-down list select the different types of reports you want emailed to you, including this Executive Report.

In the 'Previous reporting period (days)' multi-select drop-down list, select when you want this report (based on last months data) emailed to you (e.g. on 8th of the month, send a report with all of last month's data, for a monthly retrospective meeting). You may want to use this to see how the business has performed in last reporting period after it has been locked.

Likewise, in the 'Current reporting period (days)' multi-select drop-down list, select when you want this report (based on the current month's data) emailed to you (e.g. Every Monday, send a report with all of the current month's latest data, for a weekly operational meeting). You may want to use this to see how the business is performing live on a weekly basis.

The selected reports (including the executive report) will now be re-generated and emailed to you on the selected days.

Personalise the executive report

To modify the report, edit the 'Report Hint'. For example, you can save 'Translate to Arabic' or say 'Focus this report for a CFO'. The next time the report is generated or emailed, the hint will be considered during the generation.

Note, this hint is remembered and used per user for all executive reports, generated or scheduled, for all periods.

Continue the executive conversation with Kippy AI

The executive report is saved in your AI Chat conversations so you can see exactly how it is generated and continue the conversation by exploring insights, risks, recommendations and strategic questions with with follow-up questions to kippy AI.

To do this, click the chat icon (top-right), and retrieve this report from your chat history.

Email executive report on demand

To generate an executive report email immediately, you can also click on the MAIL icon in the schedule pop up next to the previous and current drop downs.

And if you want the latest executive report emailed to you immediately and you are not at your desktop, you can also generate it on the go from the kippy mobile app by clicking the Email icon.

Other things to note:

- the executive report is personalised to each user based on when it was generated and what data you can see, so different people may each see different executive report.
- the executive report is generated for the current reporting period and the latest one generated per reporting period is displayed.
- you can go to historical periods and generate reports for those months. The Previous button provides a shortcut to view the previous months executive report.
- kippy administrators can set up report schedules for other users in Tools | Settings | Users.

KPIs

Each employee in a team is then given individual objectives and KPIs that can be different, but must be aligned to the corporate objectives.

OKRs

Employee's can propose individual objectives and KPIs. Whilst managers can also help define and review the proposals - before approving them.

The screenshot shows the 'Maintain' interface in Kippy. The top navigation bar includes 'KPIs', 'Projects', and a user dropdown for 'Emma Windsor'. The main content area is titled 'Maintain' and shows a list of KPIs under the perspective 'Customers | Provide quality & innovative customer service | Positive customer feedback'. The list includes various KPIs such as 'Increase customer base & products and services | # of customers with sales more than 1 Mill', 'Increase customer base & products and services | # of new product introduced', and 'Total # of new international customers'. Each KPI is marked as 'Unapproved'. The interface also features a sidebar with navigation options like 'Summary', 'Wheel', 'Dashboard', 'Details', 'Drill-down', 'Compare', 'Print', and 'Analyze'. A bottom status bar shows the current time as 'Friday, October 15, 2021 3:38 PM' and a 'Leave a message' button.

Full OKR mode

The screenshot shows the 'OKR mode' toggle interface. It features a large heading 'OKR mode' and a section titled 'Set OKR mode on and off'. Below this, there is a toggle switch with the label 'ON' and a text box. A callout box states: 'Changes all labels from KR to KR for all users in the organisation.'

Targets

Each KPI must be SMART and is therefore given a target to be measured at a predefined frequency (e.g. monthly, quarterly, semi-annual or annual).

Updating Actuals

KPI Owner UI

The actual progress of each KPI can be provided by a variety of mechanisms.

- It can be provided directly by the employee in the kippy interface in the Scorecard screen

The screenshot displays the Kippy Scorecard interface. At the top, there's a header with navigation tabs (KPIs, Projects), a user dropdown (Emma Windsor), a date selector (Oct 2021), and utility links (Language, Password, Settings, Sign out). The main area is titled 'Scorecard' and is organized into sections: Perspectives (225%), Customers (350%), Finance, Internal Process (100%), and People. Each section contains a table of KPIs with columns for KPI Name, Direction, Weight, Frequency, Unit, Cumulative Target, Actual, and Score. For example, under Customers, 'Positive customer feedback' has a target of 2 and an actual of 7, resulting in a 350% score. Under Internal Process, 'Timely closure of audit observations' has a target of 100 and an actual of 100, resulting in a 100% score. A legend at the bottom right indicates score ranges: >100% (green), 80-99% (yellow), <80% (red), Target (blue), Missing (grey), and Not due (white).

Perspectives	Score
Customers	350%
Provide quality & innovative customer service	350%
Positive customer feedback	350%

Finance	Score
Internal Process	100%
Build effective organization governance	100%
Timely closure of audit observations	100%

People	Score
Build a performance driven culture	

Actuals can also be updated in the Details screen

36      "year": "2019"
37    },
38  ]
39 }
```

Formulas

- Actual can be auto-calculated using formulas (e.g. the percentage of two other KPIs).

Formula

```
=cloud.kippy.percentage("Actual Test  
Effort", "Planned Test Effort")
```

The in-built formulas include divide, multiply, add, subtract, percentage, min, max and average. These each take two parameters which are the names of KPIs in the current team. The result will be set as the KPI actual.

The use formula takes one parameters e.g. =cloud.kippy.use("Actual Test Effort") and will set the actual to the value of that KPI.

The abs formula takes no parameters (e.g. =cloud.kippy.abs()) and will set the actual to the positive value if a negative value is entered (e.g. -1 => 1, 0=>0, 1=>1)

Also, the copy function can be used to make the Actual the same as the Actual for another KPI from the same or different Team. (e.g. copy the 'items sold' KPI from the Sales team).

Formula

```
=cloud.kippy.copy("Sales", "Items Sold")
```

The children formula can be used to sum the actual of all KPIs with the name *kpiName* in the current team's direct sub-teams (i.e. one level below) e.g. `=cloud.kippy.children.sum("kpiName")`

If the *kpiName* is not provided, then the name of the current KPI will be used e.g.
`=cloud.kippy.children.sum()`

You can also get the average and weighted average of children's scores and actuals.

KPI's on different teams can be referred to by prefixing the KPI name with the name of the Team and a fullstop e.g. `=cloud.kippy.percentage("Actual Test Effort", "Sales.Planned Test Effort")`

Scores can also be manipulated with the following functions:

Function	Description
<code>=cloud.kippy.score.top()</code>	Restrict score to maximum of 100
<code>=cloud.kippy.score.top(110)</code>	Restrict score to a maximum value e.g. 110
<code>=cloud.kippy.score.bottom()</code>	Restrict score to minimum of 0
<code>=cloud.kippy.score.bottom (10)</code>	Restrict score to a minimum value e.g. 10
<code>=cloud.kippy.score.range (20, 80)</code>	Restrict score to be within the range specified
<code>=cloud.kippy.score.positive()</code>	Absolute value e.g. -5 will be 5
<code>=cloud.kippy.score.negative()</code>	Absolute value multiplied by -1
<code>=cloud.kippy.score.mid(20,90)</code>	Set score as 0, 80 or 100 if below, between or above the two parameters

Formula

```
=cloud.kippy.score.top()
```

Formulas will turn red if they fail validation.

You can also use complex formulas like eval

```
=cloud.kippy.eval(if('Net profit' > 0, max('Net profit', 'Sales.Total sales'), avg('Total budget', 100)))
```

More detail here: <https://www.kippy.cloud/formula>

Metrics

Variables can be set to be used in formulas. Each variable is scoped per period but can be used in any team. Variables can be set via API calls. Changing the value of variable will automatically re-calculate all formulas that reference them.

Formula variables (Aug 2023)

Current variables

Variable	Value
total items sold	850
units produced	900

Filter variables

Close

Add new variables

Enter new variables

A list of key value pairs e.g.
Days of month=30
Units produced=900

Add variables

Generated: Fri Aug 11 18:03:14 UTC 2023

The formula e.g. `=cloud.kippy.use("param1")` will use the actual value of the *param1* – where *param1* is either the name of KPI in the current team or the name of a metric variable.

Automatic system metrics are also available e.g.

- “Appraised employees” is auto-updated with number of employees appraised.
- “High performers” is auto-updated with number of employees appraised above 80%.
- “Total appraisable users” is auto-updated with total number of appraisable employees.

Contact support for more automatic metrics based on your use case.

Reviewing actuals

Manager UI

Each actual submission is reviewed by the manager for clarification, adjustment or clarification.

Managers can quick approve with a single click, approve with notes, and adjust (with/without notes).

Manager approval microapp

Managers can also review actuals with a standalone express “approval” microapp.

History

Review historical organisation performance by going back to previous months and years.

Chat and wiki

Clarifications can take the form of in-context chat conversations, with attachments of files, images, videos, etc. with a full audit trail.

Kippy – Features

The screenshot displays the Kippy dashboard interface. At the top, there's a navigation bar with tabs for KPIs, Projects, and CEO. The main content area is divided into several sections:

- Perspective | Objective | KPI:** A section for configuring KPIs, showing details like Perspective (Customers), Objective (Increase customer base & products and services), KPI Name (Awareness has spread), Owner (sari@thesolutioncrowd.com), Direction (Increase is better), Weight (1x), Frequency (Quarterly), Unit (10), and Data Source.
- Bar Chart:** A chart showing data for Q1, Q2, Q3, and Q4. The Y-axis ranges from 0 to 500. The bars are colored green for Q1 and red for Q2, Q3, and Q4.
- KPI Targets and Actuals table:** A table showing targets and actuals for Q1, Q2, Q3, and Q4.
- History:** A section showing an audit log with a message from nauman.khan@thesolutioncrowd.com.
- New note for Oct 2021:** A section for adding new notes.

An "Insert File" dialog box is open in the center, allowing users to select a file or enter a file URL. The dialog box has a "Choose file" button, a "No file chosen" message, a "File URL" input field, and an "INSERT FILE" button.

Need help?

Task viewing

All tasks are automatically presented in an Inbox, TimeLine and Kanban board for each user to help ensure they are actioned in a timely manner - with automated alerts when past due.

Tasks can be drag and dropped to different statuses in the Tasks screen.

Projects

As well as individual and team KPIs, employees can also be made responsible for milestones on key Projects.

The Projects microapp summarizes all projects and project performance on a Gantt chart.

Programmes

Projects can be organized into programmes and then reported upon with information segmented and summarized using the Programme Report.

The filters can be used to show and hide information as needed, including charts and annual views.

Kippy – Features

Live dashboards

The progress of all this information is used to maintain live dashboards of performance across every dimension, including:

- By corporate performance
- By team
- By shared objective
- By project
- By employee
- And much, much more.

You can analyze your data by different dimensions.

Interact, filter, drill-down and animate the nodes using your mouse. Hover over the filters to learn more.

Kippy – Features

Compare how two items are trending over the year.

The screenshot displays the 'Compare' section of The Solution Crowd dashboard. It features a navigation bar at the top with tabs like Home, Analyze, Collaborate, Manage, Reports, Lenses, Tools, and Help. A search bar shows 'CEO'. On the right, there are filters for time period ('Sep / Q3') and date ('2025'). Below the navigation bar, a table compares various KPIs across different roles.

Strategy map

View the org wide strategy on a strategy map.

The strategy map is available for the level 1 team and for any other team.

The strategy map shows the objective scores for the selected period and year.

Links between objectives can be created with a simple drag-and-drop from one objective to another.

Links can also be given descriptions (by turning on objective link descriptions in Tools | Settings | Objectives).

Work list

Quick links to action items for your attention.

In order, they are:

- Appraisals and self-appraisals for your review
- Review actual submissions
- Approve unapproved KPIs/OKRs
- Current period Checkins for your attention
- Previous period Checkins for your attention
- Your outstanding Tasks

Click on links to be taken directly to those screens. Hover to see description of each. The numbers indicate how many. Tick indicates none.

Shift-click on the ‘actuals to review’ and ‘unapproved KPIs’ to be taken to alternative screens.

Staff performance

The individual performance summary of each employee shows the live calculated performance score of that employee, in relation to their weighted score based on their forecast and actuals, for all individual and team KPI and milestones they are responsible for.

Staff appraisals

Managers can then appraise employees based on competencies. Please note:

- The competencies are weighted, defined and customized by administrators per the employee's role.
- Appraisals can be performed on a monthly and/or year-to-date basis (for non-cumulative KPIs)

- The manager's appraisal automatically creates an appraisal report which is automatically sent to the employee.

- The employee can then interact with the manager to discuss, create IDPs and if necessary escalate.

- The appraisal generates an average employee score and rating for the employee based on the weighted average of the performance score and the competency score.

Team	Role	Appraisee
Team A	Software Engineer	John Doe
Team B	Product Manager	Jane Smith
Team C	Marketing Specialist	Michael Johnson
Team D	Operations Manager	Sarah Williams
Team E	Finance Analyst	David Brown
Team F	Human Resources	Emily Davis
Team G	Quality Assurance	Robert Miller
Team H	Business Development	Lisa Anderson
Team I	Systems Administrator	James Wilson
Team J	Customer Support	Amanda Taylor

Appraisee

Hovering on the weighted average shows how the weighted average was calculated.

Competencies can be expanded to show the description.

Competency can be presented as buttons instead of drop-downs.

Competencies can be grouped and presented in groups.

Self appraisals

Employees can also perform self appraisals to indicate how they feel they are performing against the set competencies.

The screenshot shows the Kippy Appraisals interface. The top navigation bar includes a menu icon, 'KPIs', 'Projects', and a user dropdown set to 'CEO'. A green banner at the top right states 'Trial expires in 14 days. Click here to subscribe.' The main header is 'Appraisals'. Below it, a dropdown menu shows 'Team | Role | Appraisee' with 'CEO | Admin | Bob Smith' selected. The 'Appraisee' section displays a profile icon, name 'Bob Smith', manager 'No', team 'CEO', and average scores. The 'KPIs' section shows 'Owned' (0), 'Missing' (0), and 'Score' (n/a). The 'Projects' section shows 'Managed' (0), 'Missing' (0), and 'Avg. Var.' (n/a). The 'Milestones' section shows 'Owned' (0), 'Missing' (0), and 'Avg. Var.' (n/a). The 'Appraisal' section displays the appraiser 'o@1jun.com', competency score '108.6%', weighted average '109', employee rating '4 (Excellent >100)', and last appraisal date '01-Jun-2022 16:'. The 'Competencies' section shows six categories with ratings: Communication Skills (3. Sometimes), Flexibility (5. Always), Job knowledge (2. Rarely), Initiative (2. Rarely), Customer Focus (3. Sometimes), and Decision Making (5. Always). A legend at the bottom right indicates color-coded performance levels: >=100% (green), 80-99% (yellow), <80% (red), Target (blue), Missing (grey), and Not due (grey).

Self-appraisals are not included in Employee Rating reports until approved by a manager.

All self-appraisals and manager appraisals are visible in an immutable audit log.

Use “Confirm appraisal details” option in settings to ensure additional details must be provided as part of each appraisal.

Employee Ratings

HR Report

This is all available to HR in a live ratings report, showing the current rating of each employee based on their average employee score - in kippy, a microapp or over web APIs.

Competencies, grades and weightings

Everything used to appraise and score staff is self-configurable.

Change weightings based on role. Change ratio of competency and KPI score for total score.

The screenshot shows the 'Add Competency' form in the Kippy application. The form is divided into three main sections:

- Add Competency:** Contains fields for 'Name', 'Competency description', 'Manager weight' (set to 1x), and 'User weight' (set to 1x). A blue 'ADD COMPETENCY' button is at the bottom.
- Set Competency Weighting Ratio (For Non-Managers):** Contains fields for 'KPI Weighting' (set to 40) and 'Competency Weighting' (set to 60). A blue 'SAVE WEIGHTING RATIO' button is at the bottom.
- Set Competency Weighting Ratio (For Managers):** Contains fields for 'KPI Weighting' (set to 60) and 'Competency Weighting' (set to 40). A blue 'SAVE WEIGHTING RATIO' button is at the bottom.

The interface includes a top navigation bar with 'KPIs', 'Projects', and 'CEO' tabs. A right sidebar contains various icons for navigation and settings. A bottom status bar shows a 'Chat now' button and a legend for performance levels: >100% (green), 80-99% (yellow), <80% (red), and Missing (grey).

Add maintain your own set of competencies. Set different competencies for different 'grades' of user.

The screenshot shows the 'Edit Competency' modal in the Kippy application. The modal is titled 'Edit Competency' and contains the following sections:

- Rename Competency:** Fields for 'Competency to rename' (Communication Skills) and 'New name' (New Competency name). A blue 'RENAME COMPETENCY' button is at the bottom.
- Edit Competency:** Fields for 'Competency to edit' (Communication Skills) and 'New name' (New Competency name). A blue 'EDIT COMPETENCY' button is at the bottom.
- Delete Competency:** Fields for 'Competency to delete' (Communication Skills) and 'Settings'. A blue 'DELETE COMPETENCY' button is at the bottom.
- Set Rating Config:** Fields for 'Rating floor', 'Rating factor', and 'Rating thresholds'.

The modal also includes a 'Description' field for 'Communication Skills' with a detailed text description. At the bottom of the modal are 'SAVE' and 'CANCEL' buttons. The background shows the same Kippy interface as the previous screenshot, but with the modal overlay.

Competencies can also be added in bulk.

Import competencies

Download the current competencies in a CSV file and then populate it with all the new and updated competencies. New competencies will be added. Existing competencies will be updated. Missing competencies will NOT be deleted.

Please upload an updated **competencies CSV file**

Acknowledgements

★★★★ Your insights and instruction are always appreciated. However, I feel that I perform and learn better when you allow me to figure out how to achieve the target on my own. 15 second ago anonymously

★ Sometimes the amount of tasks and responsibilities on my plate feel overwhelming. I would be grateful if you are able to provide any assistance with something I am struggling with. 47 second ago by usain@exorg.com, a direct report who interacts weekly

★★ I was surprised that you found my ideas to be far off base. In order to avoid future misunderstandings about what direction you want me to take, I would like to have more frequent and detailed discussions. 1 minute ago by usain@exorg.com, a direct report who interacts daily

★★★★★ I appreciate all of the coaching and mentoring opportunities you have kindly provided. I want to continue working closely with you to promote my professional growth and career development. 1 minute ago anonymously

★★★★★ Whenever I run into an unforeseen issue I know that I can come to you to discuss it. I hope we can continue to tackle those roadblocks and come up with solutions together. 2 minutes ago anonymously

★★ Great effort to get the project live - but would be great to see the output of any retrospective. 30 minutes ago anonymously

★★★★★ I want to thank you for always showing enthusiasm and being willing to jump in wherever the team needs assistance or guidance. That kind of leadership really helps us to stay motivated. 1 hour ago by usain@exorg.com, a direct report who interacts weekly

Governance

All this is controlled with automated governance.

Roles

Only the appropriate users, with the appropriate roles, for the appropriate teams can view and edit the appropriate information.

The screenshot shows the Kippy dashboard interface. A modal window titled "Users related to this board" is open, displaying a list of users categorized by role: Admin, Managers, and Users. The background shows a dashboard with various charts and tables.

Users related to this board

Admin

- Owner: owner@thesolutioncrowd.com (CEO)

Managers

- nauman.khan@thesolutioncrowd.com (CEO)
- sari@thesolutioncrowd.com (CEO)

Users

- bob@thesolutioncrowd.com (CEO)
- hi@thesolutioncrowd.com (CEO)
- test@thesolutioncrowd.com (CEO)

At the bottom of the modal, there is a button labeled "Leave a message".

Managers have additional screen to perform HR functions.

Organisations can configure the access mode according to their company policy.

Team visibility model

Access mode

DOWN: All descendants of own team.

SAVE ACCESS MODE

The 5 access modes are explained below. These can be customized further, as per specific requirements.

Access model 2 – UP-DOWN

All descendants of own team. Plus, direct ancestors of own team, and managers can edit those ancestors.

* Example based on logged in user belonging to a level 3 team.

Access model 3 – UP-DOWN RESTRICTED

All descendants of own team. Plus, direct ancestors of own team, but managers can not edit those ancestors.

* Example based on logged in user belonging to a level 3 team.

Access model 4 – FULL

All teams, anywhere in the organisation. Managers can edit any team.

* Example based on logged in user belonging to a level 3 team.

Access model 5 – FULL RESTRICTED

All teams, anywhere in the organisation. Managers can only edit descendants of own team.

* Example based on logged in user belonging to a level 3 team.

Cross-functional teams

Roles and permissions are hierarchical by default but can be overloaded to give a user access to teams outside of their hierarchy by assigning them 'additionalTeams'. This allows management of a matrix organisation.

A manager can also be marked as the primary manager for a team. This helps e.g. when a team has many managers, or a sub-team manager has temporary responsibilities for also managing the department.

See <https://www.kippy.cloud/user-roles> for more info.

Auditing

Every change is automatically audited in an immutable log.

System owners can review the system-wide audit log.

ADD PLANNING RULE

By default, KPI statuses must be submitted within one week after month end

ADD ACTUAL SUBMISSION RULE

Leave a message

Legend: >100% 80-99% <80% Target Missing Not due

The screenshot shows the Kippy dashboard interface. A modal titled "Add actual submission rule" is open in the center. It contains two input fields: "Range" with the value "Fri, October 15, 2021 @ 00:00 - Fri, October 22, 2021 @ 00:00" and "Reason" which is empty. Below these fields are two buttons: "CANCEL" (orange) and "ADD ACTUAL SUBMISSION RULE" (blue). In the background, a table lists submission rules. The first row shows a rule for the year 2021, unlocked from Wednesday, March 17, 2021 12:00 AM to Wednesday, March 24, 2021 12:00 AM, created by owner@thesolutioncrowd.com, with a date created of Wednesday, March 17, 2021 7:18 PM, and a reason of "Covid related exemption". A "REMOVE" button is next to this rule. Below the table is an "ADD PLANNING RULE" button. Further down, a message box states: "By default, KPI statuses must be submitted within one week after month end", with an "ADD ACTUAL SUBMISSION RULE" button below it. The dashboard includes a top navigation bar with "KPIs", "Projects", and "CEO" tabs, and a right sidebar with various icons for navigation. A legend at the bottom right shows color-coded boxes for ">100%", "80-99%", "<80%", "Target", "Missing", and "Not due".

User management

Simple in-app management

Manage users in app (or Integrate with your internal JML “joiner-move-leaver” process).

Invite additional users to teams with particular roles. Invitations based on inviter's role and cascading privileges.

Users can be added with alias email addresses, as silent (so not receive any email notifications), as unlicensed users (who can be managed in the system but not login themselves) and hidden (so that they do not appear in reports e.g. for admin and system-to-system users).

Users can use their alias email address as the login username.

Other meta-data can also be stored about users including grades, designations, employee ID and additional information.

View all users in one report.

Sign out

Manage your own user profile

Manage profile of your teams' users

Augment dashboards with additional user info

Tree depth

Configure amount of information shown to each user by team level.

This is useful if certain users don't want to be overloaded with low-level data.

For example, in an organisation with 7 levels - if CEO tree depth equals 3, CEO will only see Level 1, 2 and 3 information.

Reminders

The system sends automatic reminders, including optionally escalating to managers.

Kippy KPI Management Ltd, 221, London, UK, W7 5AA

Notifications

By default, the system sends employees email notifications in numerous scenarios, including:

- Late or overdue actual submissions
- Reminders of tasks based on reminder dates and due dates
- Draft KPIs needing approval
- Approved KPIs needing update
- Self-appraisals to managers
- Appraisals by managers
- Notes attached to KPIs and Projects of interest to the employee
- Feedback received

Each user can also set a “Silent mode” in their user profile, so they do not receive kippy notification emails.

Hosting options

All this provides a solution that is:

- A flexible appraisal mechanism for all staff, at any cadence, fully aligning everything top-down and bottom-up
- An always live view of corporate health by every dimension with data accuracy
- A low-friction framework for continuous improvement

From a technical perspective, kippy is unique in that it does NOT provide a rigid Commercial off-the-shelf product.

Instead, a totally standalone kippy instance will be deployed to a cloud or infrastructure of your choosing.

As well as configuration of the capabilities, the code for the core product will be branched just for you, allowing any low-level changes to be made specifically for you.

Other SaaS providers have one product for all their clients. They usually segment the data - but the app and features remain identical for all clients. A one-size fits all solution!

Other SaaS solutions

What does that mean for you? You have to put your requirements in a shared backlog for all your clients. You have to wait for the next major release. You have to do workarounds in your business processes to fit the constraints of their product.

What approach does kippy take? We deploy your very own isolated instance. We create bespoke functionality to perfectly fit your needs (and then later putting them behind feature switches for everyone else).

What does this mean for you? You don't have to put your requirements in a shared backlog for all our clients. You don't have to wait for our next major release. You don't have to do workarounds in your business processes to fit our product.

kippy cloud solution

Web APIs

This isolation increases agility, and so do the kippy web APIs. Every activity in the kippy user interfaces can also be performed by invoking simple web APIs, so information can be automatically pushed and pulled from and to any system.

What does this mean for you? You can easily pull in employee performance for a specific set of KPIs from any tool or system used in your organisation. You can push any appraisal, discussion, report, etc. to any other tool or system used in your organisation.

More details on the APIs available here <https://www.kippy.cloud/api>

Functions

Pull and transform data without coding or support from IT. Dynamically set your actuals by referencing other KPIs with functions like add, subtract, multiply, divide, percentage and average.

Need a new function or adapter, we'll make it for you. Want to code your own, we'll host it for you. Want to host it yourself, we'll call it as needed. Want to push the values, call our APIs. Whatever your use case, we've got you covered!

Microapps

No matter how great a dashboard, report or app user interface is, it will never be perfect for every persona, in every company, in every situation.

Kippy comes with great user interfaces by default, but also lets you create user specific micro-apps with custom reports and dashboards, geared exclusively to a particular person, for a specific use case, just for your organisation.

So don't just use your tools, love them!

Dedicated environments

Need one or more non-prod environments? Spin up as many non-prod environments as you need - in minutes!

Your Kippy instance can be deployed to

- the shared Google Cloud (in London),
- in other Google Cloud AppEngine instances around the world,
- on other cloud providers,
- on your hosting partners infrastructure
- on your own infrastructure

Your kippy instance can also be deployed with different configurations for high-resilience and failover.

Fully configurable

Everything in kippy is self-configurable via the in-built admin console.

This includes

- changing 1x,2x,3x to greater than 3 (e.g. 1x to 100x)
- locking appraisals
- complex weighting and score calculation configuration
- changing default language and color themes
- resetting passwords
- full user management
- edit, rename, move and delete perspectives, objectives, KPIs, projects and milestones
- appraisal competencies with descriptions and weighting
- feedback criteria
- temporarily disabling appraisals for the whole organisation
- workflow of task Kanban columns
- no-code system-to-system integration (see Wrike demo, JD Edwards demo, Microsoft Dynamics 365 demo)
- the list of values in each competency drop down in the appraisal screen
- set new KPIs, objectives, projects to be inactive by default for previous years
- modifying the start of org reporting cycle e.g. 'January to December' becomes 'April to next March'.
- restrict all KPI scores between 0 and 100.
- set the upper and lower bound of that restriction for all KPIs (i.e. from 0 and 100 to other numbers)
- change the days after month reminders should be sent on
- set the days that reminders should also be escalated to the KPI/KR owners manager
- change the score thresholds for the RAG (red amber green) status for KPIs and Projects

- allow managers to quick set up
- ensure managers set appraisal notes before saving appraisal
- allow full unlock of the system whilst setup is being completed
- calculating non-cumulative KPI/OKR scores on the last score vs the average of the scores that year to date.
- bulk import users and competencies

Multi-language

Kippy is available in over 100+ languages, including English and Arabic. The language can be defaulted to the whole organisation. Plus, each user can flip between languages as needed.

All screens and help have already been translated to Arabic and verified by a native Arabic speaker.

Help

All labels come with helpful help text on mouse hover.

In-context help and bi-directional chat window for support.

Free user manuals, how-to guides and help articles are also available via the Help buttons in the app and on the website www.kippy.cloud

Personalisations

The system comes with multiple configurable colour themes. Users can personalize colours.

Set user profiles or let users self manage.

Mobile responsive

All screens are mobile-responsive, scale up and down with browser zoom and are optimized for smartphones, tablets, laptops, desktops and extra large screens for presentations and dashboards. Available on iPhone and Android. All browsers supported.

Mobile app

Download the iPhone app from the Apple AppStore for a quick and easy way for staff to submit due KPI actuals and managers to review them.

Navigation

Voice control

Change screens using your microphone.

 **Kippy - Voice Commands - Cheat Sheet**

 Click the microphone icon and clearly say one of the commands below.

Helpful phrases What can i say What can i ask Open quick start How to Help	View screen Dashboard Executive summary Wheel Scorecard Compare Analyse Print Show teams View users	Personalize Logo Profile picture Password Background colour
KPIs and Projects Show <kpi name> Show <project name> Next Previous Create new KPI Create new project Maintain Projects mode Kpi mode	Change view Change the reporting period to <month> Show next year Show previous year Go to <team name> team	Admin commands Show the audit Unlock plans and actuals Or, say 'Settings for' followed by : Teams Users Perspectives Objectives KPIs Projects Milestones
Invite colleagues invite user	Voice commands only work on Google Chrome – which will ask 'to use the microphone'.	After a prolonged period of silence, the mic will automatically turn off.

Keyboard shortcuts

Shortcut to screens by pressing Shift and Function keys:

F1 Strategy
F2 Teams
F3 Summary
F4 Wheel
F5 Dashboard
F6 Scorecard
F7 Details
F8 Maintain
F9 Drill down
F10 Inbox
F11 Tasks
F12 Timeline

Tactile dashboards

Re-size dashboards and graphs by double-clicking, dragging, mouse wheel for zoom, etc.

Customisations

The system is integrated with OAuth2.0 identity mechanisms including Google Login, Slack Login and Microsoft Entra (formerly known as Microsoft Active Directory).

The system is integrated with SendGrid for emails and can be easily integrated to include notifications via SMS and other email servers including Exchange.

The system is horizontally scalable (without limit) on Cloud infrastructure with automatic upscaling and downscaling of resources based on user demand.

As well as building adapters and interacting with web APIs, it is also an option to buy a licensed copy of the source code and extend the product with your own internal technology teams, without or without help from the kippy build team.

Various documented use cases are available for interacting with external and internal Enterprise systems such as Power BI, Sharepoint, Microsoft Team Foundation Server, Trello, Google Sheets, Google Translate, Slack and Zapier - which can be used to easily connect to Oracle ERP and other business intelligence tools.

Online assisted and non-assisted courses are already available on kippy methodology and tooling for users and admins, in English and Arabic. On-premise training is available.

Detailed use cases available on www.kippy.cloud for using web APIs for data exports.

<https://www.kippy.cloud/web-api-integration-with-sharepoint>

Built-in integrations

Several configurable integrations are already built-in, and can be enabled for our Enterprise customers. Please get in touch to learn more.

The PDFShift integration allows scheduled reports to be sent with advanced visualisations. Please visit <https://pdfshift.io> to get your API key. Setting sandbox mode to on allows the service to be used for free – but puts a small PDFShift logo on your reports.

Billing

Subscribe in-app with simple per user billing (monthly or annually).

Invoice based billing available for bulk and enterprise usage.

Security

Authenticate with Slack, Google and Microsoft single-sign on. Plus multi-factor authentication.

- We will not share your data with anyone EVER!
- Kippy Cloud is hosted on Google Cloud Engine in the zone europe-west2, with access extremely restricted - no data is stored on any other physical servers. Please visit <https://cloud.google.com/compute/> for more information
- All data is encrypted in transit and at rest.
- KPI performs regular security and vulnerability audits, checks and monitoring.
- Identity and integration is always done, at a minimum, using OAuth2.0 authentication and https.
- All data is encrypted with the encryption keys stored securely. In the case of a breach, we will notify the affected parties. Customers SOC integration can also be configured upon request.
- Similar principles would be applied for customized hosting.
- KPI Cloud is built with multi-tenancy from the ground up, so your data is segregated at all tiers, ensuring only you can see your data.
- Access to data is further restricted by role-based access controls within your organisation and teams - ensuring users can not unintentionally see each other's data.
- If you stop your subscription, kippy will change your access to read-only for a period of 90 days, during which you will not be able to change your data, but can re-join at any time. After this period, all your data will be hard deleted from kippy.
- You may request a full dump of your data and audit history at any time. Data will be provided via RESTFUL JSON endpoints or via an encrypted zip of JSON files, made available for secure download.
- End-of-contract data extraction - All the users data is available to the user via the web APIs at any time. All kippy data is regularly backed up. However, users are also encouraged to take extracts of their data for backups or local integrations as often as they choose.
- Kippy is fully functional on all modern browsers. Google Chrome is the recommended browser. No application to install. Designed for use on mobile devices.
- The service interface is part of the application but only available to users with the appropriate role. The interface allows the user to self-serve any maintenance activities - including adding, renaming, deleting, moving all data objects. All activities are fully audited and follow governance rules to ensure system integrity. The service interface is only available to the appropriate system user, who can a) view the audit log to be viewed b) bulk import existing KPI data c) delete users from the system.
- Kippy is designed to ensure there is practically no usage based impact across users because:
 - - most complex processing is done in the client's browser and not on the kippy servers.
 - - hosting provides rate limiting and DDOS protection

- - sophisticated caching refreshes in low-priority background jobs
- - sophisticated auto scaling-up of underlying hosting resource to over 1000 times typical load (which auto scales-down to reduce cost)
- Staff security clearance - Conforms to UK standard BS7858:2012 and Developed Vetting (DV) and OWASP
- Default Data storage and processing locations. United Kingdom. Other hosting options available.
- Data Centre security standards - CSA CCM version 3.0
- Penetration testing frequency - At least once a year. Additional Pen Testing available upon requests.
- Protecting data at rest - Physical access control, complying with CSA CCM v3.0. Physical access control, complying with SSAE-16 / ISAE 3402. Scale, obfuscating techniques, or data storage sharding.
- Data export approach - Users can call kippy's secure web APIs (with the appropriate authentication credentials) to extract all their current and historical data in JSON format. Other data import formats - MS Excel template to collect and bulk upload existing info. Updates can be submitted using RESTFUL/JSON web API calls. No other system ingress or egress channels to data exposed.
- Data protection between buyer and supplier networks and Data protection within supplier network - TLS (version 1.2 or above)
- Approach to resilience - Multi-availability zone replication. Auto-scaling. Automated testing. Canary releases. Production Monitoring
- All configuration is managed with Infrastructure as code (IaaS) principles. All code is managed in a private GitHub repository. All changes are reviewed with a formal Architecture design process with formal design documents. All builds and releases are tracked in the CI/CD pipelines. All releases are security and vulnerability scanned.
- Change management processes ensure all releases are a) released outside of business hours b) tested in a Stage production-like environment and c) canary-released before full roll out. API iteration is tracked through semantic versioning.
- Vulnerability management approach Each release is scanned using Google Cloud Web Security Scanner. Security fixes are given highest priority by the in-house development team. Patches can be deployed via the CI/CD pipelines within a minute.

Extensions

The final key point is that if the needed feature or mechanism is not clearly articulated in the proposed solution, Kippy should not be viewed as a closed and unchangeable platform.

The upfront investment of making kippy a modern cloud-based solution, with the latest modern development practices, means it is incredibly flexible and extensible - allowing quick and easy customisation to your exact needs.

Whether that be specific workflows, complex business rules, new features or deep integrations. The intention is to use the project discovery phase to identify those exact needs and configure and customize to the exact detailed end user requirements.
